

# Install htop on CentOS 7 / CentOS 8

**htop** is a good option to monitor your system interactively. In order to install htop, you will need to use **dnf**. If you cannot install htop by yum, you will need to follow following procedure on CentOS 8.

## For CentOS 8

STEP 1. Enable the EPEL repository

```
dnf install https://dl.fedoraproject.org/pub/epel/epel-release-latest-8.noarch.rpm
```

STEP 2. Update the system after the installation of the EPEL repository

```
dnf update
```

STEP 3. Install **htop**

```
dnf install htop
```

## For Centos 7

STEP 1. Enable the EPEL repository

```
sudo yum -y install http://rpms.remirepo.net/enterprise/remi-release-7.rpm
```

STEP 2. Update the system after the installation of the EPEL repository

```
sudo yum -y update
```

STEP 3. Install **htop**

```
sudo yum -y install htop
```
