Default profile scripts for zsh in Mac OSX

For my easier use in Mac OSX, I usually add below scripts at **/etc/zshrc**

```
# added by Chun on 2020-03-04
alias vi=vim
alias weather='curl wttr.in'
PS1="[%n]%1~ %# "
PATH=.:$PATH:/etc/init.d/:$HOME/.local/bin:$HOME/bin
```
