PPTP

- pptp[3186] : anon warn[decaps_gre:pptp_gre.c:439]: discarding bogus packet — When pppd is running as installed, but sometimes pppd does not work and showing warning message - discarding bogus packet: pppd is dropping its packet intentionally, so VPN is actually not working from that time. The workaround I can do is just disconnect the VPN and reconnect.
- PPTP Command line setup on CentOS 7 — CentOS provides an PPTP solutions in the repository,
