

Get array keys in PHP

`array_keys()` return array keys in a string array

```
<?php
$array = array(0 => 100, "color" => "red");
print_r(array_keys($array));

$array = array("blue", "red", "green", "blue", "blue");
print_r(array_keys($array, "blue"));

$array = array("color" => array("blue", "red", "green"),
              "size"  => array("small", "medium", "large"));
print_r(array_keys($array));
?>
```
