

MySQL combination with Heredoc in PHP

Heredoc is one of the useful solution to secure better readability when we code SQL Query in PHP

Below is an example using Heredoc for SQL Query in PHP

```
$sql = <<<SQL
    select *
    from class
    where grade>5
SQL;
```

Below is another example using Heredoc with variables for SQL Query in PHP

```
$sql = <<<SQL
    insert into celebrity( id, name, gender, year, month, day, hour, lunar, img, thumbnail,
created_at, updated_at, active)
    values('{ $id}', '{ $name}', '{ $gender}', { $yy}, { $mm}, { $dd}, { $hh}, '{ $lunar}',
'{ $new_img_filename}', '{ $new_thumbnail_filename}', '{ $now}', '{ $now}', true)
SQL;
```
