# Add New Address to gmail without SMTP (forwarding-only-address)

If you want to use alternative email address instead of your original gmail address, you need to provide details for an SMTP server which will be used to send the mail.

The first action you should do is Settings Accounts Add another email address like below

Then you will see popup window like below

Add another email address you own

Enter information about your other email address.
(your name and email address will be shown on mail you send)

Name: John Doe

Email address: foo@foo.com

☑ Treat as an alias. Learn more

Specify a different "reply-to" address (optional)

Cancel   **Next Step »**

When you click "Next Step", you will see following:

Add another email address you own

Send mail through your SMTP server

Configure your mail to be sent through lifeplanet.co.kr SMTP servers Learn more

SMTP Server: `smtp.gmail.com` Port: 587 ▼

Username: `foo@foo.com`

Password: `••••••••`

◉ Secured connection using TLS (recommended)

○ Secured connection using SSL

[Cancel] [« Back] [**Add Account »**]

If you have smtp server available, you can use it. Otherwise, please follow below

1. For *SMTP Server*, put `smtp.gmail.com`
2. For *Username*, your full Gmail address including @gmail.com
   `Note that you should put your user account including domain name if you use personal domain name like foo.com`
3. For *password*, provide an App Password generated in Google Accounts at https://security.google.com/settings/security/apppasswords
   The first action you should do is put your application name.

Select the app and device you want to generate the app password for.

Select app — Select device ▼

Select app

Mail

Calendar

Contacts

YouTube

Other *(Custom name)*

GENERATE

In my case, I just use gmail-<domain name>. For example, if my domain name is foo.com, I just put gmail-foo.com like below:

Select the app and device you want to generate the app password for.

gmail-foo.com   ×

GENERATE

If everything goes fine, you will get your password like below:

Generated app password

Your app password for your device

How to use it

Email

securesally@gmail.com

Password

•••••••••••

Go to the settings for your Google Account in the application or device you are trying to set up. Replace your password with the 16-character password shown above.
Just like your normal password, this app password grants complete access to your Google Account. You won't need to remember it, so don't write it down or share it with anyone.

DONE

4. Leave *Secured connection using TLS* selected as is.
5. *Add Account*
