Set F1 key to reindent in Sublime Text

You may often need reindent your code. You can set F1 key to reindent your code by following steps:

Preference Key Bindings Add following code in the block

```
{ "keys": ["f1"], "command": "reindent" , "args": { "single_line": false } }
```

If you want CTRL+SHIFT+F instead of F1, just copy and paste following text

```
{ "keys": ["ctrl+shift+f"], "command": "reindent" , "args": { "single_line": false } }
```
