# Codes need to be changed when upgraded from PHP 5.6 to PHP 7.3

When you upgrade from PHP 5.6 to PHP 7.3, you will be faced unexpected stopping on your PHP code in case of following case.

## Missing ereg_

For example, ereg_replace can be replaced by preg_replace like below:

```
$pre_name = preg_replace( "/http(.*).com\//", "", $url);
$pre_name = preg_replace( "/\//", "_", $pre_name);
$pre_name = preg_replace( "/\?(.*)/", "", $pre_name);
$pre_name = preg_replace( "/.php(.*)/", "", $pre_name) . "_" . str_replace(":", "", $scheduled_time);
```

## Missing mysql_

All of mysql_ function is gone.
